XVIII Iberian Peptide Meeting

Full Program

PL Plenary Lecture 52+6 min 25+4 min ST Short Talk 12+3 min 12+3 m

		lash Talk 3+1 min Monday 27/11	
12h00		Registration	
14h00		Opening remarks	
14h10	PLI	Maria Luisa Mangoni Sapienza University of Rome Esc peptides for novel therapeutics against Pseudomonas aeruginosa lung and ocular surface infections: beyond antimicrobial activity	Chair: Rosario González-Muñiz
15h10	ST1	Helena S. Azevedo I3S, Universidade do Porto Peptide building blocks to recreate basement membranes and develop in vitro BBB models	osan
	ST2	Douglas V. Laurents IQF Blas Cabrera, CSIC Design principles for polyproline II helix peptides	o Gon
	СП	Karin Rustler Iris Biotech Novel protecting groups for side chain functional groups of amino acids	zález
	FTI	Marco Cavaco Instituto de Medicina Molecular The use of a selective, nontoxic dual-acting peptide for breast cancer patients with brain metastasis	-Muñiz
	FT2	Pedro M. Alves 13S, Universidade do Porto Dual-effect chitosan nanoparticles with conjugated pro-angiogenic and antimicrobial peptides	
16h10		Coffee break & Posters	
17h00	ST3	Adam Carrera-Aubesart Universitat Pompeu Fabra Topoisomers of a snake venom-derived antimicrobial peptide: lessons from in vivo studies	<u>2</u>
	ST4	Bruna Costa I3S, Universidade do Porto The Dhvar5-nanogels performance in combating orthopedic device-related infections	air: M
	CT2	Alexandre Broges PARALAB-Bio Pushing the boundaries in biomolecular interaction analysis with the WAVEsystem	Chair: Manuel N. Melo
	FT3	Sofia A. Martins C2TN, Instituto Superior Técnico, Universidade de Lisboa Bone-seeking peptides targeting the RANK-TRAF6 interface for bone metastases theranostics	Z. 3.
	FT4	Ana S. Silva-Herdade Instituto de Medicina Molecular Bioactive peptides in functional foods can mitigate stress behaviors in zebrafish (Danio rerio)	ole
18h00			
19h00			

Welcome cocktail

Tuesday 29/11

		Tuesday 28/11		
9h00	KN1	Javier Montenegro CiQUS, Universidad de Santiago de Compostela Supramolecular peptide assemblies for membrane transport and biomimetic systems	Cho	9h
9h30		Octavio L. Franco Universidade Católica de Brasília In silico optimization of antimicrobial peptide enables the development of bioinspired products Joana Calvário ITQB NOVA Investigating amino acid enrichments and patterns: understanding biases in liquid-liquid phase separation	<mark>Cha</mark> ir: Helena S. Azevedo	9h
		Luísa Aguiar Gyros Protein Technologies An automated peptide synthesis and purification platform to overcome operational complexity Christine Cruz-Oliveira Instituto de Medicina Molecular Targeting arboviral infections in the central nervous system with peptide-porphyrin conjugates	S. Azeve	
	FT6	Fernando Neiva Nunes ITQB NOVA Room for improvement in the initial Martini 3 parametrization of peptide interactions	do	
10h30		Coffee break & Posters		10h
11h30	ST7	Vera Neves Faculdade de Medicina, Universidade de Lisboa Peptide Shuttles to improve therapeutic action in the central nervous system	Cha	11h
		Salvador Ventura Universitat Autonóma de Barcelona Exploiting α -helical peptides to block and unveil the structure of α -synuclein toxic oligomers	ir: Jo	
	519	Jorge H. Fernandez Universidade Estadual do Norte Fluminense Targeting integrin-mediated cell adhesion: unveiling the anti-metastatic potential of A9(x) cyclic peptides	Chair: João Galamba Correia	
		Michael Timme University of Osnabrueck Structural and topological determinants of Hexokinase-VDAC interaction	lamk	
		Beatriz L. Pires-Lima LAQV-REQUIMTE Synthesis of pyridine-based melanostatin derivatives	a Co	
	FT7	José M. Coelho Instituto de Medicina Molecular Antibiofilm effect of synthetic antimicrobial peptides on Gram-positive and Gram-negative bacteria	rreia	
13h00				
		Lunch		13h
14h30	PL2	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting	C	13h 13h
14h30 15h30	ST12	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis	Chair: F	
	ST12	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor	Chair: Paula	
	ST12 ST13 ST14	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis	Chair: Paula Gom	
	ST12 ST13 ST14 FT8	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRF1, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular $\alpha_v \beta_3$ integrin peptide inhibitors impact on fibrinogen-erythrocyte binding	Chair: Paula Gomes	13h
	ST12 ST13 ST14 FT8	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular	Chair: Paula Gomes	131
	ST12 ST13 ST14 FT8	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular α,β ₃ integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular C protein-dopamine receptor	Chair: Paula Comes	13h
15h30	ST12 ST13 ST14 FT8 FT9	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular $\alpha_v \beta_3$ integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular G protein-dopamine receptor type 2 (D2R) interface		Pr Pr Pr
15h30 16h30	ST12 ST13 ST14 FT8 FT9	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular a,\(\beta_3\) integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular G protein-dopamine receptor type 2 (D2R) interface Coffee break & Posters María Angeles Jiménez IQF Blas Cabrera, CSIC		13h
15h30 16h30	ST12 ST13 ST14 FT8 FT9 ST15 ST16	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular a, \(\beta_3 \) integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular G protein-dopamine receptor type 2 (D2R) interface Coffee break & Posters María Angeles Jiménez IQF Blas Cabrera, CSIC Understanding protein interactions using NMR studies of peptide models Ana Gomes LAQV-REQUIMTE		13h
15h30 16h30	ST12 ST13 ST14 FT8 FT9 ST15 ST16 ST17	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular a, \(\beta_3 \) integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular G protein-dopamine receptor type 2 (D2R) interface Coffee break & Posters María Angeles Jiménez IQF Blas Cabrera, CSIC Understanding protein interactions using NMR studies of peptide models Ana Gomes LAQV-REQUIMTE Peptide-based therapeutics towards the topical treatment of skin infections Álvaro de la Cruz Instituto de Química Médica, CSIC	Chair: Paula Gomes Chair: Nuno C. Santos	13k
15h30 16h30	ST12 ST13 ST14 FT8 FT9 ST15 ST16 ST17	Norbert Sewald Bielefeld University Cytotoxic peptides and conjugates for tumour targeting Akhilesh Rai CNC, Universidade de Coimbra Multifunctional antimicrobial coatings to prevent peri-implantitis Ana Salomé Veiga Faculdade de Medicina, Universidade de Lisboa Activity and mode of action of pepRFI, a new CXCR4-targeted HIV inhibitor Lorenzo Cianni University of Antwerp Exploring targeted autophagy modulation in pursuit of precision therapeutics for cancer and atherosclerosis Catarina S. Lopes Instituto de Medicina Molecular a, \(\beta_3 \) integrin peptide inhibitors impact on fibrinogen-erythrocyte binding Cátia Rosa C2TN, Instituto Superior Técnico, Universidade de Lisboa Design of novel peptides to target the intracellular G protein-dopamine receptor type 2 (D2R) interface Coffee break & Posters María Angeles Jiménez IQF Blas Cabrera, CSIC Understanding protein interactions using NMR studies of peptide models Ana Gomes LAQV-REQUIMTE Peptide-based therapeutics towards the topical treatment of skin infections Álvaro de la Cruz Instituto de Química Médica, CSIC Design and synthesis of novel hemagglutinin fusion peptide inhibitors of H1N1 influenza virus Rita Melo C2TN, Instituto Superior Técnico, Universidade de Lisboa		13k

Wednesday 29/11

	Wednesday 25/11	
9h00	KN2 Diana Lousa ITQB NOVA Fusion peptides: Scenes from the lives of key players in viral infections	Chair
9h30	ST19 Maria C. Lucana Institut Químic de Sarrià, Universitat Ramon Llull BrainBike peptidomimetic enables efficient transport of antibody derivatives across brain endothelium	<mark>Chai</mark> r: María Angeles Jiménez
	ST20 Sónia Gonçalves Conjugation of nanostars with PaMAP1.9 to improve its anticancer activity	Ange
	ST21 Miguel Maldonado Novel leishmanicidal compounds as potent dimerization disruptors of LiTryR	eles Ji
	FT10 Beatriz Vieira-da-Silva Instituto de medicina Molecular Unravelling the factors that govern the ability of antiviral peptide-porphyrin conjugates to translocate the blood-brain barrier	ménez
10h30	Coffee break & Posters	
11h30	ST22 Diego Núñez-Villanueva Instituto de Química Médica, CSIC A diastereopure azepane quaternary amino acid as effective inducer of β-turns and 3 ₁₀ -helices	Cha
	ST23 Sara C. Silva-Reis LAQV-REQUIMTE Insights on the influence of proline residue on the biological effects of glypromate bioconjugates	Chair: Miguel A.
	ST24 Ana Alcalde-Ordóñez CiQUS, Universidad de Santiago de Compostela Selective cleavage of DNA replication foci in mammalian cells by Cu ^{ll} peptide helicates	Juel /
	ST25 Ana C. Borges-Araújo ITQB NOVA Study of alamethicin pore formation in lipid membranes using the Martini 3 coarse-grained force field	R.B.
	ST26 Rúben D. M. Silva C2TN, Instituto Superior Técnico, Universidade de Lisboa Evaluating the activity of CXCR4 and D2R-targeting peptides using the TRUPATH platform	Castanho
	ST27 Ana Rita Ferreira LAQV-REQUIMTE What can an ionic liquid do for the bioactivity of antimicrobial peptides? The case of W-BP100	nho
13h00	Closing remarks	
13h15	Lunch	\neg
	*Attendance must be confrmed at registration time	
	Poster list (Posters P1 through P10 listed as Flash Talks FT1 through FT10)	_
PII	Anu Ploom University of Tartu Kinetic study of aza-amino acid incorporation into peptide chain: Impact of steric effect of the side chain	
P12	Axel Sarmiento Fuentes CiQUS, Universidad de Santiago de Compostela Chemically fueled droplets for out-of-equilibrium sequence-specific RNA binding	

- P13 Carlos Cuadros-Higueras Instituto de Química Médica, CSIC A "difficult sequence" cardiovascular peptide. Optimizing synthesis and purification
- P14 Carmen González-González CiQUS, Universidad de Santiago de Compostela Single α -helical peptide with conductive and fluorescence properties
- P15 Carolina C. Buga Instituto de Medicina Molecular & ITQB NOVA Molecular insights into membrane fusion mediated by the parainfluenza fusion peptide
- P16 David Q. P. Reis ITQB NOVA
- Peptide-based coacervates as catalytic microreactors
- P17 Eduardo F. Vicente Universidade Estadual de São Paulo Structural modifications of the antimicrobial peptide Ctx(Ile²¹)-Ha generate more potent peptide analogues with improved biological activities for animal production applications
- P18 Patricia Sanmiguel CiQUS, Universidad de Santiago de Compostela Helix-like peptides approach to three-way-junction binding
- **P19** Renato B. Pereira LAQV-REQUIMTE Synthesis and antibacterial activity of Trichoderma longibrachiatum longibramide E analogs **P20** Ricardo Ferraz LAQV-REQUIMTE
 - Peptides derived from pet food protein ingredients: from proteomics to in vitro bioactivity profiling
